HD : 2000 x 1400 Pixels
5GB / Film in ProRes 15GB in Cinema DNG

4K : 4000 x 3000 Pixels
15GB / Film in ProRes 40GB in Cinema DNG

Apple Pro Res : Professional Video format, "visually lossless". Perfect to keep the original grain of Super 8. Compatible with most players.

Cinema DNG : Raw uncompressed format. You get a folder with each frame of the film in .dng format (around 3600 frame / film). This format is more flexible and ideal for advanced post-production (exposure compensation or color inversion for example). Compatible with Da Vinci Resolve/Premiere and other softwares.

The files can be uploaded or transferred on physical support.
